Marker Ball Installation

- Tracer wire must lay flat and straight, no kinks may be present.
- All connections must be soldered and watertight.
- Tape must not be damaged or torn.
- Tracer wire run must not exceed 50' without additional test station.
- Marker ball buried no more than 4'.
- Do not crush ball when installing or compacting soil.
- Install balls at risk and critical buried components.

Utility specific caution tape to be used on all installations to alert future excavators to utility location; tape to be buried minimum of 1' below grade and minimum of 2' above utility.
